

Self-Priming Centrifugal Water Pump

This self-priming centrifugal pump is designed for efficient water transfer and drainage applications. Featuring a robust cast iron construction and an open impeller design, it can handle solids and debris with ease.

Product Overview

High-Efficiency Centrifugal Pumping

This self-priming centrifugal water pump is a robust solution designed for efficient water transfer and drainage in demanding environments. Constructed with durable cast iron and featuring an open impeller, it is specifically engineered to handle solids and debris without compromising performance. The flexible belt-driven system allows for adjustable speed control, ensuring compatibility with a wide range of power sources for irrigation, construction, and general utility needs.

Technical Specifications

Model Number	112659-965
Drive System	Belt-driven
Impeller Design	Open Impeller
Material	Cast Iron

Applications

Primary Applications

- Agricultural Irrigation
- Construction Site Drainage
- Water Transfer
- Debris-laden Water Handling
