

Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is engineered for efficient water transfer and dewatering. Its durable construction and powerful centrifugal impeller ensure high flow rates and reliable self-priming performance.

Product Overview

High-Performance Self-Priming Solution

The NS-100 is a robust self-priming centrifugal water pump engineered for efficient water transfer and demanding dewatering tasks. Designed with a powerful centrifugal impeller, it ensures high flow rates and consistent operational reliability. Its advanced self-priming capability facilitates quick and hassle-free startups, eliminating the need for manual priming processes in industrial, agricultural, and construction environments.

Key Features

Operational Highlights

- Self-priming capability for rapid startup
- Durable construction for long-term reliability
- High-efficiency centrifugal impeller design
- Suitable for industrial, agricultural, and construction use

Applications

Suitable Industries

Industrial, Agricultural, Construction, Dewatering
