

Self-Priming Centrifugal Water Pump

This self-priming centrifugal pump is designed for water boosting, irrigation, and general water transfer applications. It features a robust construction with a cast iron pump body and a powerful electric motor.

Overview

Self-Priming Centrifugal Water Pump

The JETDP series is a high-performance self-priming centrifugal pump engineered for efficient water boosting, irrigation, and general water transfer. Featuring a robust cast iron body and a powerful electric motor, this unit is designed for durability and ease of installation. It is an ideal solution for residential and light commercial applications requiring consistent flow rates and reliable pressure.

Technical Specifications

Pump Type	Self-Priming Centrifugal
Body Material	Cast Iron

Application

Suitable For	Residential • Light Commercial
Primary Applications	Water Boosting, Irrigation, Water Transfer

Features

Key Features

- Self-priming capability
- Robust cast iron construction
- High flow rate delivery
- Easy installation design
