

Self-Priming Centrifugal Water Pump

This self-priming centrifugal pump is designed for pumping clean water. It is suitable for domestic water supply, small-scale irrigation, and pressure boosting applications.

Product Overview

Self-Priming Centrifugal Water Pump

This self-priming centrifugal pump is engineered for the efficient transfer of clean water, even in scenarios where air may be present in the suction line. Designed for quiet operation, reliability, and low energy consumption, it is an ideal solution for domestic and civil water pressurization, distribution, and irrigation systems. Its robust design ensures dependable performance when installed in sheltered or enclosed environments.

Technical Features

Recommended Applications	Domestic Water Supply, Small-scale Irrigation, Pressure Boosting, Rain Water Recovery, Civil Distribution
Fluid Compatibility	Clean water and non-chemically aggressive liquids
Installation Environment	Enclosed or sheltered from inclement weather
