

Self-Priming Centrifugal Water Pump

This self-priming centrifugal electropump is designed for water pumping applications. It features a robust construction for durability and efficient performance.

Product Overview

High-Efficiency Water Management

The JCR-150 self-priming centrifugal electropump is engineered for reliable and efficient water transfer across various industrial and agricultural applications. Its robust construction ensures long-lasting durability in demanding environments. This versatile unit is perfectly suited for irrigation needs and general water movement tasks requiring consistent self-priming performance.

Technical Specifications

Model	JCR-150
Pump Type	Self-priming Centrifugal Electropump

Certifications

Certifications	CE
