

Self-Priming Diesel Water Pump

This self-priming diesel water pump is designed for efficient water transfer in various applications. The pump is designed for high flow rates and is capable of handling solids.

Product Overview

High-Performance Diesel Water Pump

The ZSH80P is a professional-grade self-priming diesel water pump engineered for reliable water transfer in demanding environments. Built on a sturdy, portable frame, this unit is ideal for irrigation, construction sites, and general dewatering tasks. Its robust design ensures durability while maintaining high flow rates even when handling solids.

Technical Specifications

Engine Model	2120F
Starting System	Recoil Start

Key Features

Features

- Self-priming capability
- High flow rate performance
- Capable of handling solids
- Sturdy frame for portability
- Diesel-powered for fuel efficiency

Applications

Common Use Cases	Irrigation, Construction, Dewatering
