

Self-Priming Jet Water Pump for Water Transfer

This jet water pump is designed for efficient water transfer and boosting pressure in residential, agricultural, and light industrial applications. This self-priming pump features a robust construction for durability and long-lasting performance.

Product Overview

Reliable Water Transfer Solution

This self-priming jet water pump is engineered for efficient water transfer and pressure boosting across residential, agricultural, and light industrial settings. Featuring a robust, durable construction, it is ideal for drawing water from wells, tanks, and streams. The unit includes a thermally protected motor to prevent overheating, ensuring safe, consistent performance and reliable operation.

Technical Specifications

Key Features

- Self-priming capability
- Robust construction for durability
- Thermally protected motor
- Compact design for easy installation
- High head delivery

Suitable Applications

Residential, Agricultural, Light Industrial, Irrigation, Pressure Boosting

Performance

Performance Highlights

1 Self-Priming

Operational Mode

1 Thermal

Motor Protection
