

Self-Priming Water Pressure Booster Pump

This self-priming water pressure booster pump is designed for domestic water supply. It features a stainless steel pump body and impeller for durability and corrosion resistance.

Product Overview

Professional Pressure Boosting Solution

The ZXJPXXX(T)INOX-B is a high-performance self-priming booster pump engineered for reliable domestic and small-scale irrigation water supply. Featuring a robust stainless steel construction, it offers excellent corrosion resistance and long-term durability. The system includes an integrated pressure tank, pressure gauge, and automatic switch for consistent, maintenance-free operation.

Technical Specifications

Features

- Self-priming capability
- Automatic pressure control
- Integrated pressure tank
- Built-in pressure gauge

Materials

Stainless Steel Pump Body, Stainless Steel Impeller

Applications

Suitable Applications

Domestic Water Supply • Garden Irrigation • Small-Scale Agriculture • Pressure Boosting
