

Self-Priming Water Pump

This self-priming water pump is designed for residential and light commercial applications. It features durable construction and provides consistent water flow for various household needs.

Overview

Reliable Water Management

This self-priming water pump is engineered for both residential and light commercial applications, offering a versatile solution for water pressure boosting and general transfer needs. Its robust construction ensures reliable, long-term performance, making it an ideal choice for irrigation systems and household water supply enhancement. The unit delivers consistent flow rates to maintain steady pressure where it is needed most.

Technical Specifications

Key Features

- Self-priming capability
- Durable construction
- Efficient motor design
- Consistent flow performance

Model Number	GP-5
Suitable Applications	Residential, Light Commercial, Water Pressure Boosting, Irrigation, Water Transfer
