

Self-Priming Water Pump for Water Supply

This self-priming pump is designed for water supply and pressure boosting in domestic applications. It is suitable for pumping clean water from wells, tanks, or streams.

Overview

Self-Priming Jet Pump

This self-priming jet pump is engineered for efficient water supply and pressure boosting in various domestic and light commercial applications. Designed to handle clean water, it is an ideal solution for drawing water from wells, tanks, or streams. Its robust construction ensures reliable performance, making it a dependable choice for irrigation systems, garden watering, and general water transfer needs.

Key Features

Fluid Compatibility

Clean Water

Primary Applications

Water Supply, Pressure Boosting, Irrigation, Garden Watering, Water Transfer

Pump Type

Self-Priming Jet Pump
