

Self-Priming Water Transfer Pump

This self-priming pump is designed for efficient water transfer and fluid handling. Its robust construction ensures durability and reliable performance in demanding environments.

Overview

Robust Self-Priming Water Transfer Solution

This self-priming water transfer pump is engineered for high-efficiency fluid handling in demanding environments. Featuring a durable cast metal housing, the unit provides reliable performance for irrigation, dewatering, and general water circulation. The integrated priming mechanism ensures quick start-ups, while the threaded inlet and outlet ports allow for secure, leak-proof connections.

Physical Properties

Housing Material	Cast metal
Connection Ports	Threaded inlet and outlet

Functional Features

Key Capabilities	Self-Priming, Efficient Water Transfer, Quick Start-up, Industrial Grade
------------------	--------------------------------------------------------------------------

Applications

Recommended Applications

- Agricultural irrigation
- Site dewatering
- General water circulation
- Fluid handling
