

# Self-Propelled Concrete Saw

This self-propelled concrete saw is designed for cutting concrete and asphalt surfaces. It features an adjustable cutting depth and a water cooling system for dust suppression and blade longevity.

## Product Overview

### Professional Concrete & Asphalt Cutting

This self-propelled concrete saw is engineered for precision cutting on both concrete and asphalt surfaces. Featuring robust engine options and a durable frame, it is built to withstand demanding construction site environments. Equipped with essential features like a blade guard and water cooling system, it ensures efficient dust suppression and extended blade life for road repairs and expansion joint projects.

## Engine & Performance

### Engine Power Output

<b>13 HP</b> Petrol Max Power	<b>9 HP</b> Diesel Max Power
----------------------------------	---------------------------------

### Available Engine Types

Petrol Engine, Diesel Engine

## Technical Specifications

### Weight

<b>115 kg</b> Petrol Model Weight	<b>135 kg</b> Diesel Model Weight
--------------------------------------	--------------------------------------

### Cutting Depth

15 cm

### Blade Size Range

30-45 cm (14-18 inch)

## Design & Operation

### Operation Mode

Self-Propelled • Manual Push

### Dimensions (cm)

90.5 x 59 x 108
