Product Overview

Professional Self-Suction Pulverizer

This self-suction pulverizer is engineered for efficient grinding of grain-based materials such as corn and beans. Featuring an automated material handling design, it ensures consistent output and reliable performance for agricultural and industrial processing needs. Its robust construction provides the stability necessary for high-volume daily operations.

Technical Specifications

Output Capacity

250 kg/h

Minimum Output

500 kg/h

Maximum Output

Motor Power

2.2 kW

Physical Dimensions

Host Size (L x W x H)

470 x 370 x 470 mm

Return Air Bucket Size

700 x 350 x 320 mm

Gross Weight

40 kg

Logistics

Packaging

Carton packing
