Product Overview

Professional Semi-Automatic Capping Solution

The FW-1(H) semi-automatic capping machine is an advanced twist-type aluminum capping solution designed for high-efficiency production environments. It is specifically engineered to meet the needs of liquor, wine, beverage, and pharmaceutical facilities. The machine features a robust stainless steel construction for long-term durability and utilizes a user-friendly interface to ensure quick adjustments for various cap sizes and container shapes.

Technical Standards

Certifications & Compliance

CE, Machinery Directive 2006/42/EC, EN 12100:2010, EN 1672-2:2005+A1:2009, EN 60204-1:2018

Operational Safety

Safety Equipment

- Emergency stop button
- Protective guards
- Compliant with industrial machinery safety standards
