Product Overview

High-Efficiency Carton Sealing

This semi-automatic carton sealing machine is engineered for precision and reliability in end-of-line packaging operations. Featuring a top and bottom belt-driven system, it ensures consistent transport and secure tape application for carton boxes. The unit is designed with a durable structure and high-quality components, offering adjustable settings to accommodate diverse carton sizes, making it an ideal choice for food, beverage, pharmaceutical, and logistics industries.

Technical Specifications

Sealing Functions

- Upper and lower side sealing
- Automatic steering
- Corner tape sealing

Operation Mode	Semi-automatic, Stand-alone, Inline integration
Drive System	Top and bottom belt drive
Customization	Yes
