

Semi-Automatic Multi-Group Espresso Machine

This professional-grade semi-automatic espresso machine is designed for commercial and home use. It features a multi-group brewing system for simultaneous espresso extraction and a high-capacity boiler for consistent temperature.

Product Overview

Professional Espresso Performance

This semi-automatic multi-group espresso machine is engineered for high-demand commercial environments, offering professional-grade extraction capabilities. The robust stainless steel construction ensures durability and reliability during peak hours in cafes or restaurants. Equipped with specialized steam wands and consistent temperature management, it facilitates the preparation of a wide variety of coffee-based beverages with precision.
