

Sewing Machine Timer Counter

This timer counter is designed for sewing machines. It provides accurate control over stitch settings to enhance productivity and ensure consistent seam quality.

Product Overview

Industrial Sewing Productivity

This industrial sewing machine is engineered for high-speed, precise fabric edge finishing. It features an integrated control panel that allows for streamlined adjustments of stitch settings and automated functions. Designed specifically for professional garment manufacturing environments, it ensures consistent seam quality and enhanced operational efficiency.

Technical Specifications

Machine Type	Industrial Overlock Sewing Machine
Core Features	High-Speed Operation, Automated Functions, Precise Stitching, Integrated Control Panel
