

Shank Adapter Rod for Rock Drilling

This shank adapter rod is designed for efficient rock drilling. Its robust construction ensures a secure attachment and optimal power transfer.

Overview

High-Performance Shank Adapter Rod

This shank adapter rod is engineered from high-quality steel grades to withstand the rigors of demanding drilling environments. Designed for drifting and tunneling applications, it ensures efficient power transfer and consistent performance. The robust construction promotes a lower cost per meter drilled, making it a reliable solution for professional drilling operations.

Technical Specifications

Available Lengths

- 0.3m
- 0.4m
- 0.6m
- 0.8m
- 1.2m
- 1.6m
- 2.4m
- 3.20m

Rod Type	R25-H22 Shank Rod
Primary Applications	Drifting, Tunneling
Rod Dimension	H22
Connection	R25
