

# Shape Forming Machine

This shape forming machine is designed for rapidly forming various shapes. It features a robust frame with integrated casters for mobility and a foot-operated control for hands-free operation.

## Overview

### Professional Sheet Forming Solution

This high-reliability forming machine revolutionizes traditional manual sheet-forming processes by significantly reducing labor intensity while boosting overall productivity. Built with a robust casting construction, the machine offers exceptional strength and structural rigidity for demanding industrial tasks. Its versatile design allows for step-by-step forming adjustments, enabling the creation of diverse figures through simple tool changes.

## Technical Specifications

Construction	Casting construction
Transmission System	Four beams construction with gemels
Operation Mode	Foot-operated, Electric-powered
Mobility Features	Yes

## Capabilities

### Tooling Compatibility

- Interchangeable tools
- Customizable figures
- Step-by-step forming

### Key Performance Indicators

**1 High**

Labor Intensity Reduction

**1 High**

Productivity Increase
