

Shielded Data Cable

Shielded computer cable designed for reliable signal transmission. Features a braided shield for electromagnetic interference (EMI) protection and a stranded conductor for flexibility and durability.

Overview

Reliable Signal Transmission

This shielded data cable is engineered for high-performance signal transmission in demanding electronic environments. It features a robust braided shield that provides essential protection against electromagnetic interference (EMI), ensuring data integrity. Designed with a stranded conductor, the cable offers superior flexibility and durability, making it an ideal choice for both internal wiring and external connections.

Technical Specifications

Shielding Type	Braided Shield
Conductor Type	Stranded

Application

Key Benefits

- Electromagnetic interference (EMI) protection
- High flexibility
- Enhanced durability

Intended Use	Internal Wiring, External Connections, Signal Transmission
