

Shielded Twisted Pair Communication Cable

This communication cable is engineered for reliable data transmission in demanding environments. Multiple shielded twisted pairs reduce interference, while a durable outer jacket protects against environmental factors.

Product Overview

High-Performance Communication Solution

This shielded twisted pair communication cable is engineered for reliable, high-speed data transmission in demanding environments. Featuring advanced shielding technology, it effectively minimizes electromagnetic interference to ensure signal integrity. The robust outer jacket provides essential protection against environmental wear, while color-coded conductors simplify the installation and termination process for professional technicians.

Construction

Shielding	Shielded Twisted Pair
Conductor Identification	Color-coded

Key Features

Interference Protection Reduced Interference • Secure Communication	
Durability	Durable Jacket, Environmental Protection

Application

Application Scope

- High-speed data transmission
- Secure communication networks
- Industrial communication systems
