

Shielded Twisted Pair Industrial Data Cable

This shielded twisted pair cable ensures reliable data transmission in industrial environments. It features robust construction and excellent signal integrity.

Product Overview

High-Performance Industrial Connectivity

This shielded twisted pair industrial data cable is engineered for reliable data transmission in challenging industrial environments. It features robust construction designed to maintain signal integrity and prevent interference in demanding applications. Ideal for secure communication systems, this cable ensures consistent performance where reliability is critical.

Technical Specifications

Core Features

- Robust construction
- High signal integrity
- Shielded design for interference protection

Cable Type	Shielded Twisted Pair (STP)
Application Environment	Industrial, Data Transmission, Interference-free
