

# Shisha Charcoal Tablet Press

This shisha charcoal tablet press is designed for the efficient production of charcoal tablets. The machine presses charcoal powder into consistent, uniform tablet shapes using a robust conveyor belt system.

## Overview

### High-Efficiency Shisha Charcoal Production

This charcoal tablet press machine is engineered for the high-volume production of uniform, high-density charcoal tablets used in shisha smoking. Built for industrial reliability, the machine features a robust design that ensures consistent quality and efficient processing of charcoal powder. It is an ideal solution for medium to large-scale manufacturers looking to optimize their output capacity.

## Technical Specifications

### Model Comparison

Model	Mould Quantity	Diameter (mm)	Pressure (KN)	Power (kW)	Weight (kg)
YJ9	9	40	250	7.5	1350
YJ12	12	30	150	7.5	1800

### Production Performance

**40 time/min**  
Output Speed

## Features

### Key Features

Continuous Feeding, Uniform Density, High Capacity, Robust Construction
