

Shock Absorber Bushing Set

This set includes multiple sizes and designs to serve different functions within a shock absorber assembly. These bushings are critical for ensuring smooth and reliable operation by reducing friction and wear.

Product Overview

High-Durability Shock Absorber Bushings

This premium shock absorber bushing set is engineered to minimize friction and wear within vehicle suspension systems. Constructed from high-strength metal with a corrosion-resistant black finish, these components ensure smooth, reliable operation and long-term durability. The set includes a versatile range of cylindrical and flanged designs tailored for precise fitment and vibration dampening.

Technical Specifications

Contents

- Flanged bushings
- Straight cylindrical bushings

Surface Treatment	Black protective coating
Units in Set	4

Features

Key Benefits	Friction Reduction, Wear Resistance, Durable Construction, Suspension Stability
--------------	---
