

Short Handle Digging Tool with Flat Blade and Tines

This short-handled digging tool is designed for gardening and landscaping. It features a flat blade on one side and three tines on the other for digging, cultivating, and weeding.

Product Overview

Versatile Gardening Performance

This short-handled digging tool is engineered for precision gardening and landscaping in confined spaces. Combining a flat blade on one side and robust tines on the other, it facilitates efficient digging, cultivating, and weeding tasks. Its compact design ensures excellent maneuverability for detailed yard work.
