

Silent Diesel Genset 550 kVA

This silent diesel genset delivers 550 kVA of power with low noise operation. The robust enclosure ensures noise reduction and weather protection.

Overview

Industrial Silent Power Solution

This high-performance diesel generator is engineered for reliable power generation in demanding environments, offering both continuous and standby capabilities. Featuring a soundproof canopy with advanced noise-reduction technology, it ensures minimal acoustic impact while maintaining efficient operation. The system integrates premium components and cloud-ready monitoring for seamless control, making it an ideal choice for industrial and large-scale infrastructure projects.

Technical Specifications

Detailed technical parameters and noise reduction design features.

Power Performance

550 kVA
ESP

500 kVA
PRP

400 V
Rated Voltage

50 Hz
Frequency

1500 r/min
Speed

Dimensions and Weight

Parameter	Value
Weight	5166 kg
Size (LxWxH)	4700*1583*2200 mm

Key Features

Engine and Alternator

- Engine: 2506C-E15TAG2
- Alternator: LSA47.2M7

Construction Highlights

Rain-proof, Dust-proof, Low Noise, Fire Retardant Interior, Cloud Monitoring
