

Silicon Carbide Waterproof Abrasive Paper - P120 Grit

This silicon carbide abrasive paper is ideal for wet sanding applications. It delivers a fine, smooth finish on a variety of materials.

Product Overview

Professional Silicon Carbide Abrasive Paper

This C34P grade waterproof abrasive paper utilizes high-quality silicon carbide abrasives bonded with a robust resin-over-resin system. Engineered on 15% latex CWT black paper imported from Europe, it offers exceptional durability for both wet and dry sanding conditions. Its versatile design ensures consistent, high-quality finishes on a wide range of surfaces, from automotive paints to wood and composite materials.

Technical Specifications

Grit Size	P120
Backing Material	15% latex CWT black paper
Abrasive Material	Silicon Carbide
Bonding System	Resin over resin

Physical Properties

Sheet Dimensions

230 mm

Width

280 mm

Length

Packaging	100 sheets
