

# Silicone Cable Terminal Accessories for Power Cables

These silicone accessories are designed for terminating power cables. They provide electrical insulation and protection for various cable configurations and voltage levels.

## Product Overview

### High-Performance Silicone Cable Accessories

These silicone cable terminal accessories provide superior electrical insulation and mechanical protection for power cable systems. Engineered from high-quality silicone rubber, they demonstrate exceptional resistance to weathering, UV radiation, and ozone. Their robust design ensures long-term stability, making them an ideal solution for maintaining safety and performance in harsh environmental conditions.

## Material and Performance

Material Composition	High-quality silicone rubber
Key Resistance Properties	Weather Resistant, Ozone Resistant, UV Resistant

## Configuration

Included Components	
<ul style="list-style-type: none"><li>• Terminations</li><li>• Joints</li><li>• End caps</li></ul>	
Versatility	Suitable for various cable configurations and voltage levels
