

Silicone Reducer Hose Straight

This straight silicone reducer hose is designed to connect components with different diameters. Constructed from durable silicone, it offers resistance to heat, pressure, and chemical degradation.

Product Overview

High-Performance Silicone Solutions

This straight silicone reducer hose is engineered for demanding automotive applications, providing a seamless transition between components with different diameters. Constructed from premium-grade, durable silicone rubber, it offers exceptional resistance to extreme heat, pressure, and chemical degradation. Its multi-layer reinforcement design ensures enhanced structural integrity, making it an ideal choice for cooling, air intake, and turbocharger systems requiring long-term reliability.

Technical Specifications

Key Features

- Straight reducing geometry
- Multi-layer reinforcement
- Smooth inner bore
- High thermal resistance

Material Type

Premium-grade Silicone Rubber

Color Options

Blue, Black, Red

Application Suitability

Recommended Systems

Coolant Systems • Air Intake Systems • Turbocharger Systems
