

SIM Card Slot for Cato-Flip Phone

This SIM card slot is designed for Cato-flip phones. It provides a secure and reliable connection for SIM cards.

Product Overview

Precision SIM Card Component

This SIM card slot is designed specifically for flip-style mobile devices, ensuring reliable connectivity and secure card retention. Engineered with precision stamping techniques, the component offers consistent performance and durability for compact electronic assemblies. It is manufactured to meet rigorous quality standards for high-volume consumer electronics applications.

Manufacturing Capabilities

Production Equipment Highlights

16 sets

16T-60T Punching Presses

16 sets

45T Multi-station Punch Presses

3 sets

160T Precision Presses

8 sets

15T-80T High-speed Presses

Supplementary Equipment

- Bending machine
- Hot air dryer
- Roller mill

Stamping & Forming Processes

Deep Drawing, Extruding, Piercing, Coining, Reverse Burring, Blanking, Forming, Embossing
