

Single Blade Labyrinth Drip Tape Machine

The single blade labyrinth drip tape machine is designed for efficient production of plastic irrigation tape. This equipment is suitable for use in gardens and croplands, saving water and energy while improving output.

Product Overview

Precision Irrigation Manufacturing

This high-performance machine is engineered for the efficient production of single blade labyrinth drip irrigation tape. By integrating advanced extrusion, forming, and winding technologies, it ensures high consistency in drip spacing and precise flow rate control. Designed for large-scale agricultural applications, this equipment optimizes water distribution to maximize irrigation efficiency while minimizing water waste.

Technical Capabilities

Key Capabilities

- Single labyrinth drip tape production
- Integrated extrusion and forming
- Automated winding process
- Precision flow rate control
- Accurate drip spacing

Certifications and Standards

Certifications

CE • ISO • TÜV Rheinland
