

Single Crystal Corundum Grinding Wheel for Electric Tools

Single crystal corundum grinding wheels are engineered for precision grinding applications. These wheels feature a high concentration of single crystal corundum abrasive, providing exceptional cutting performance and long service life.

Product Overview

Precision Grinding Excellence

This single crystal corundum grinding wheel is engineered specifically for precision grinding applications in professional electric tools. It features a high concentration of abrasive material, which ensures exceptional cutting performance and extended service life. The wheel is designed for optimal balance and minimal vibration, allowing for high-accuracy results across a wide range of materials.

Technical Specifications

Key Performance Features

- High abrasive concentration
- Superior cutting performance
- High-precision balance
- Minimal operational vibration
- Excellent surface finish capability

Application Compatibility

Electric Tool Accessories

Compatible Processes

Wet Grinding, Dry Grinding
