

# Single-Cylinder Diesel Engine

This single-cylinder, four-stroke diesel engine is engineered for industrial and agricultural applications. It provides reliable power output and fuel economy through direct fuel injection and efficient combustion.

## Overview

### Robust Single-Cylinder Power Solution

The ZS195 is a high-performance, four-stroke diesel engine engineered for reliability in both industrial and agricultural environments. Featuring a horizontal configuration and direct fuel injection, this engine is optimized for fuel economy and consistent torque output. Its durable construction, including a cast iron cylinder liner, ensures a long service life even under demanding operational conditions.

## Technical Specifications

Bore Diameter	95 mm
Engine Configuration	Single-Cylinder, Four-Stroke, Horizontal
Cooling System	Radiator or Hopper Cooling

## Applications

### Suitable Applications

- Electric Generators
- Water Pump Systems
- Small Tractors
- Construction Equipment

## Maintenance

### Maintenance Advantages

Easy Maintenance • Simple Repairability • Durable Crankshaft • Cast Iron Liner
