

Single-End Automatic Wire Crimping Machine

This automatic machine is designed for crimping one end of wires. It features a conveyor belt for efficient material handling and a control panel with a digital display for precise adjustments.

Overview

High-Efficiency Wire Processing

This Single-End Automatic Wire Crimping Machine is engineered for high-volume production environments. It streamlines manufacturing workflows by integrating automatic cutting, stripping, and crimping into a single, reliable process. Designed for consistency and precision, this machine is an essential asset for facilities requiring efficient electrical connector assembly.

Performance Metrics

Production Speed

3500 pcs/hr

Output Rate

Technical Specifications

Power Supply	220V, 2-Phase
Air Pressure	0.75 mpa

Capabilities

Process Functions	Automatic Cutting, Automatic Stripping, Automatic Crimping
