

Single Gang Metal Surface Mount Switch with Neon Indicator

This is a single-gang metal surface mount switch. It includes a neon indicator and is designed for wall mounting.

Product Overview

Robust Surface Mount Control

This single-gang metal surface mount switch is designed for industrial and commercial environments requiring durability and high visibility. Featuring a built-in neon indicator, it provides clear operational status feedback for users in any lighting condition. The rugged metal enclosure ensures long-term reliability and protection against physical impact.
