Product Overview

Professional Kitchen Ventilation Ducting

This single-layer aluminum exhaust ducting is a flexible and cost-effective solution designed for high-performance kitchen ventilation. Engineered to withstand demanding environments, it offers excellent heat resistance and durability for range hoods and air conditioning systems. The lightweight, corrugated construction allows for easy installation even in compact or complex spaces.

Technical Specifications

Performance Metrics

150

Maximum Operating Temperature

3000 Pa

Maximum Pressure

Material Composition

Property	Specification
Primary Material	Single Layer Aluminum
Spring Wire Material	Carbon Steel
Wire Diameter	0.9 - 1.3 mm
Foil Thickness	0.032 - 0.07 mm

Features & Compliance

Recommended Applications

- Kitchen Range Hoods
- Air Conditioning Systems
- Residential Ventilation
- Commercial Kitchen Exhaust

Key Attributes

Fire Resistant, Flexible, Corrugated Design, Lightweight, Cost-Effective
