

Single Mast Aluminum Aerial Lift

This series of indoor lifts is widely used in various industries, including plant and lobby settings. It offers a steady lifting experience and is easy to operate for high-altitude tasks.

Product Overview

Versatile Aerial Work Solution

The Single Mast Aluminum Aerial Lift is a compact and lightweight platform designed for efficient high-altitude operations in indoor environments. Featuring a stable single aluminum mast design, it allows operators to perform maintenance, installation, and cleaning tasks with precision. Its narrow profile enables easy navigation through standard doorways and within restricted workspaces, making it an ideal tool for factories, warehouses, and retail spaces.

Technical Specifications

Suitable Environments	Warehouses, Factories, Retail Spaces, Lobby Areas, Construction Sites
Power System	Electric Motor

Safety & Design

Integrated Safety

- Sturdy Guardrails
- Emergency Stop Buttons
- Steady Lifting Mechanism
- Compact Maneuverability

Maneuverability	Yes
