

Single Phase Electricity Meter

This single-phase electricity meter accurately measures electrical energy consumption. It operates at 220V with a rated current of 5(20)A and a frequency of 50Hz, and has a meter constant of 720 kW·h.

Overview

Reliable Energy Measurement

This single-phase electricity meter is a robust solution designed for precise monitoring of electrical energy consumption. Engineered for standard residential and light commercial applications, it ensures consistent performance at 220V. Its durable construction and clear interface make it an essential tool for accurate energy management.

Technical Specifications

Rated Current

5 A

Base Current

20 A

Maximum Current

Rated Voltage

220 V

Frequency

50 Hz

Meter Constant

720 imp/kWh

Model Number

DD662F-4

Features

Device Type

Single-phase • Electricity Meter
