

Single Phase Electronic Multi-Rate Watt-Hour Meter

This single-phase electronic multi-rate watt-hour meter utilizes advanced microelectronics technology and SMT process design. It aligns with GB/T 17215 2002 and GB/T 15284 2002 standards for motionless exchange meritorious electric energy meters.

Overview

Advanced Energy Measurement

This single-phase electronic multi-rate watt-hour meter utilizes advanced microelectronics technology and SMT manufacturing processes. Designed for precision and reliability, it complies with national standards for motionless exchange electric energy meters. It is engineered to support multi-rate billing requirements, making it an ideal solution for accurate electrical energy consumption tracking.

Technical Specifications

Rated Voltage	220 V
Rated Frequency	50 Hz
Current Rating	5(30)A
Pulse Constant	3200 imp/kWh

Standards & Compliance

Standards Compliance	GB/T 17215-2002, GB/T 15284-2002
----------------------	----------------------------------

Features

Core Features

- Multi-rate measurement capability
- Infrared communication port
- Pulse indicator
- Digital energy consumption display
