

Single Pole 250V 35A Isolator Switch

This single pole isolator switch is designed for 250V applications and has an IP56 waterproof rating. It features a robust operating lever and internal switch toggle that must be aligned in the 'OFF' position during cover installation to ensure correct 'ON-OFF' indication.

Product Overview

Robust Single Pole Isolator Switch

This Single Pole Isolator Switch is designed for reliable performance in demanding environments requiring a 250V and 35A capacity. Built with an IP56 waterproof rating, it ensures durability against moisture and environmental exposure. The unit features a robust operating mechanism, making it a dependable choice for industrial or commercial electrical isolation needs.
