Product Overview

Professional Lighting Control

This Single-Pole Single-Throw wall switch is designed for reliable and efficient lighting control in both residential and commercial environments. Built with high-quality, fire-retardant materials, the switch prioritizes safety and durability while maintaining a sleek, minimalist aesthetic. Its engineering features, including silver alloy contactors and solid copper components, ensure optimal electrical conductivity and a long service life.

Construction and Materials

Material Composition

Fire-Retardant ABS, Pure Copper, Silver Alloy

Technical Specifications

Key Features

- Anti-fading surface finish
- Engineered for easy wiring and assembly
- Wall protection design to prevent damage during maintenance
- Flush-mount design

Core Performance

100 % Fire Retardant

Material Rating

Switch Type

Single-Pole Single-Throw (SPST)
