

Single Press Juicer

This household kitchen appliance is a single pressing machine designed for juicing. It features a control knob on the front and a compact design suitable for home use.

Product Overview

Professional-Grade Juicing Experience

This high-performance single press juicer combines a stylish, streamlined design with advanced motor technology for superior durability and endurance. Engineered using food-grade materials, it ensures health and safety throughout the extraction process. The innovative blade design and slag-juice isolation system guarantee high yield and ease of use in any kitchen environment.

Design & Build

Design Highlights

Streamlined Design, Food Hygiene Grade Materials, Splash-proof Internal Cover

Performance
