Product Overview

High-Performance Grinding Solution

The Single Row Diamond Grinding Wheel is engineered for efficient material removal on concrete, stone, and other hard surfaces. Featuring a robust steel core and high-quality diamond segments, this tool offers aggressive grinding action and consistent durability. Its segmented design, combined with strategically placed holes, ensures optimal cooling and debris removal for reliable performance during surface preparation and coating removal tasks.

Technical Specifications

Key Features

- High-quality diamond grit
- Durable steel core
- Heat-reduction holes
- Aggressive stock removal

Segment Configuration	Single Row
Compatible Materials	Concrete, Stone, Hard Materials
