Product Overview

Professional Precision Cutting

This sintered hot-pressed diamond saw blade is engineered for high-performance cutting of porcelain, vitreous, and hard tile. The thin-rim design ensures fast and chip-free results, while the innovative slotted core provides essential stress relief for consistent performance. It is a versatile tool designed to deliver smooth, controlled cuts while minimizing vibration and noise during operation.

Technical Specifications

Compatible Equipment

- Angle grinders
- Tile saws
- Masonry saws
- Electric power tools

Manufacturing Process

Sintered, Hot-Pressed

Rim Design

Continuous rim with slotted core

Performance Features

Cutting Method

Wet Cutting • Dry Cutting

Key Performance Indicators

1

Chip-free finish

1

Low vibration
