

# Six-Cylinder Diesel Engine

The BF6L913C is a robust diesel engine designed for various industrial applications. Its compact design allows for easy integration into a wide range of equipment, offering high performance and durability.

## Overview

### Robust Industrial Power

The Six-Cylinder Diesel Engine is a reliable and high-performance power unit designed for demanding industrial applications. Featuring a 6.128L displacement and a direct injection system, it delivers a balanced power output of 114KW. Its air-cooled design and durable construction make it an ideal choice for generators, construction equipment, and agricultural machinery, ensuring smooth operation in various environments.

## Performance Metrics

### Maximum Output

**114 KW**  
Max Output

**620 N.m**  
Max Torque

### Operating Speeds

- Rated Speed: 1500-2500 r/min
- Max Torque Speed: 1650 r/min

## Technical Specifications

### Engine Configuration

Parameter	Value
Cylinder Number	6
Displacement	6.128L
Bore X Stroke	102 X 125 mm
Compression Ratio	18:1
System Details	Air Cooled, Direct Injection
Firing Order	1-5-3-6-2-4
Power Takeoff	Flywheel
