

Skid Steer Loader

The self-leveling valve maintains an even level and prevents bucket spillage. A large capacity fuel tank allows for extended working hours.

Product Overview

Performance and Efficiency

This skid steer loader features a self-leveling valve that maintains balance and prevents bucket spillage, significantly increasing operational efficiency. It is designed for extended productivity with a large 105 L fuel tank. The machine offers exceptional utility through a universal quick coupler system, ensuring compatibility with a wide range of industry-standard attachments.
