Product Overview

Versatile Sweeper Attachment

This high-performance sweeper attachment is engineered for skid steer loaders, providing an efficient solution for road maintenance, snow removal, and general surface cleaning. Designed for durability and ease of use, it features a robust brush system capable of clearing debris and snow in demanding environments. Its compatibility with various skid steer models makes it a versatile tool for construction sites and municipal operations.

Key Features

Operational Benefits

- Robust brush system for effective debris removal
- Compatible with multiple skid steer loader models
- Designed for durability on various surfaces
- Efficient clearing capabilities for winter operations

Ideal Applications

Road Maintenance, Snow Removal, Construction Sites, Surface Cleaning

Technical Specifications

Tire Type

Nylon Tubeless

Tire Model

HT601
