

# Skid Steer Loader with Hydraulic Brakes

This skid steer loader features a compact structure and maneuverable movement, making it suitable for narrow space operation. It has hydraulic brakes and an open cabin with a mechanical control system.

## ADDITIONAL IMAGES

## Overview

### Versatile Skid Steer Loader

This powerful skid steer loader is engineered for high-performance in construction, landscaping, and agricultural environments. Featuring a robust hydraulic system and a 50HP engine, it offers excellent maneuverability and productivity in confined work zones. With a flexible operating capacity ranging from 700kg to 1500kg, it provides reliable material handling solutions for diverse project needs.

## Performance Metrics

### Key Performance Indicators

**50 HP**

Engine Power

**1500 kg**

Max Operating Capacity

**12 km/h**

Max Travel Speed

Tipping Load

1400 kg

## Hydraulics and Capacity

Hydraulic Pump Flow

62.5 L/min

Bucket Capacity

0.36-0.7 m<sup>3</sup>

## Physical Dimensions

### Machine Dimensions

Parameter	Value
Total Height	2050 mm
Length with Bucket	3380 mm
Length without Bucket	2450 mm
Width with Bucket	1740 mm
Dumping Height	2310 mm
Ground Clearance	185 mm

## Certifications

### Compliance and Standards

CE Certified
