Overview

High-Performance Ice Breaking and Maintenance Solution

This compact skid steer loader is engineered specifically for demanding road construction and pavement maintenance tasks, featuring a specialized ice-breaking roller attachment. Designed for versatility and durability, the machine excels in breaking up compacted snow and ice, ensuring safety and accessibility in urban environments and tight construction sites. With an emphasis on operator comfort, hydraulic precision, and ease of maintenance, this loader delivers reliable, high-torque performance for professional-grade operations.

Key Features

Core Capabilities

Ice Breaking, Pavement Maintenance, Road Construction, Compact Maneuverability

Technical Specifications

Lift Mechanism	Vertical Lift
Hydraulic Pump Type	Gear Pump
Attachment Change System	Yes
Cooling System	Integrated fluid-based heat exchanger

Operator Environment

Cab Amenities

- Anti-collision cage
- Seat belt
- Optional seat warmer
- Optional air conditioner
- Ergonomic pilot joystick controls

Maintenance

Efficient Service Design

The machine is engineered for high productivity with simplified maintenance. Inspection and filling tasks are streamlined through an accessible upper and back hood design, allowing quick access to major components without the need to move loading arms.
