Product Overview

Professional Slotted PVC Wiring Duct

This high-quality slotted PVC wiring duct provides an efficient solution for cable management in electrical and electronic environments. Featuring a structured design with parallel side-wall slots, it allows for seamless wire routing and easy installation within control panels and switchboards. Constructed from flame-retardant material, it ensures optimal protection and professional organization for complex cable systems.

Technical Specifications

Insulation Voltage

2500 V

Max Insulation

Flammability Rating

UL-94-V0

Max Service Temperature

550 °C

Design Features

Key Design Elements

- Integrated cover and bottom system
- Parallel slotted sidewalls for easy routing
- Warp-proof material construction
- Strong interlocking mechanism for secure assembly

Application Areas

Common Applications

Control Panels, Switchboards, Electrical Enclosures, Industrial Wiring
